Test your knowledge on connecting data to objectives

GESAMTPUNKTZAHL 3

1. Fill in the blank: Data being used for analysis should align with ____ and help answer stakeholder questions.

1 / 1 Punkten

- ☒ business objectives
- ☐ current trends
- ☐ project limitations
- ☐ obsolete projects

✓ **Richtig**

Data being used for analysis should align with business objectives and help answer stakeholder questions.

2. Before analysis, a company collects data from countries that use different date formats. Which of the following updates would improve the data integrity?

1 / 1 Punkten

- ☐ Organize the data by country
- ☐ Leave the dates in their current formats
- ☐ Remove data in an unfamiliar date format
- ☒ Change all of the dates to the same format

✓ **Richtig**

Changing all of the dates to the same format would improve the data integrity.

3. When should data analysts think about modifying a business objective? Select all that apply.

0,75 / 1 Punkten

- ☒ When the data doesn't align with the original objective

✓ **Richtig**

Data analysts should think about modifying a business objective when the data doesn't align with the original objective and when there is not enough data to meet the objective.

- ☐ When they find a row of duplicate data

- ☒ When the analysis is taking longer than expected

Diese Antwort sollte nicht ausgewählt werden

Data analysts should think about modifying a business objective when the data doesn't align with the original objective and when there is not enough data to meet the objective.

- ☒ When there is not enough data to meet the objective

✓ **Richtig**

Data analysts should think about modifying a business objective when the data doesn't align with the original objective and when there is not enough data to meet the objective.
