1. Scenario 1, questions 1-5

1 / 1 Punkten

You've just started a job as a data analyst at a small software company that provides data analytics and business intelligence solutions. Your supervisor asks you to kick off a project with a new client, Athena's Story, a feminist bookstore. They have four existing locations, and the fifth shop has just opened in your community.

Athena's Story wants to produce a campaign to generate excitement for an upcoming celebration and introduce the bookstore to the community. They share some data with your team to help make the event as successful as possible.

Your task is to review the assignment and the available data, then present your approach to your supervisor. Click the link below to access the email from your supervisor:

Course 2 Scenario 1 Email from Supervisor.pdf
PDF-Datei

Then, review the email, and review the Customer Survey and Historical Sales datasets:

- You may click the link to create a copy of the dataset: [Customer Survey](#) or CSV to download below

CustomerSurvey - CustomerSurvey.csv

- You may click the link to create a copy of the dataset: [Historical Sales](#) or CSV to download below

HistoricalSales - HistoricalSales.csv

After reading the email, you notice that the acronym WHM appears in multiple places. You look it up online, and the most common result is web host manager. That doesn't seem right to you, as it doesn't fit the context of a feminist bookstore. **Still, you should assume it's correct and continue with the project.**

☐ True

☒ False

Richtig

Asking questions is a very important part of data analysis. The best course of action is to send your boss a polite, concise email, asking for the meaning of WHM.

2. Scenario 1 continued

0,75 / 1 Punkten

Now that you know WHM stands for Women's History Month, you continue reviewing the datasets. You notice the [Customer Survey](#) (link to download CSV instead below) dataset contains both qualitative and quantitative data.

CustomerSurvey - CustomerSurvey.csv

The qualitative data includes information from which columns? Select all that apply.

☐ Column B (Survey Q2: If answered "Yes" to Q1, how do you plan to celebrate?)

☐ Column D (Survey Q4: If answered "Yes" to Q3, how many books do you typically purchase during March?)

☒ Column F (Survey Q6: What types of books would you like to see more of at Athena's Story?)

Richtig

The qualitative data includes information from columns B, E, and F.

☒ Column E (Survey Q5: What do you like most about Athena's Story?)

Richtig

The qualitative data includes information from columns B, E, and F.

Sie haben nicht alle korrekten Antworten ausgewählt.

3. Scenario 1 continued

1 / 1 Punkten

Next, you review the customer feedback in column F of the [Customer Survey](#) (link to download CSV instead below) dataset contains both qualitative and quantitative data.

CustomerSurvey - CustomerSurvey.csv

The attribute of column F is, "Survey Q6: What types of books would you like to see more of at Athena's Story?" In order to verify that children's literature and feminist zines are among the most popular genres, you create a visualization. This will help you clearly identify which genres are most likely to sell well during the Women's History Month campaign.

Your visualization looks like this:

Count of Survey Q6: What types of books would you like to see more of at Athena's Story?

What is a pie chart effective for demonstrating?

- ☐ Trends over time
- ☐ Where things are located on a map
- ☒ Percentages that make up a whole
- ☐ Relationships between variables

✓ Richtig

Pie charts are effective at demonstrating the percentages of a whole, such as the percentage of customers who would be interested in purchasing books of different genres.

4. Now that you've confirmed that children's literature and feminist zines are among the most requested book genres, you review the [Historical Sales](#).

1 / 1 Punkten

If you do not have a Google account, download the CSV file below:

HistoricalSales - HistoricalSales.csv

You're pleased to see that columns D and E have something in common: They both contain data that's specific to children's literature and feminist zines. This will provide you with the information you need to make data-inspired decisions. In addition, the children's literature and feminist zines metrics will help you organize and analyze the data about each genre in order to determine if they're likely to be profitable.

Next, you use the SUM function to calculate the total sales over 52 weeks for children's literature. What is the correct syntax? Type your answer below.

=SUM(D2:D53)

✓ Richtig

The correct syntax is =SUM(D2:D53). The SUM function adds the values of a range of cells. D2:D53 is the specified range.

5. Scenario 1 continued

1 / 1 Punkten

After familiarizing yourself with the project and available data, you present your approach to your supervisor. You provide a scope of work, which includes important details, a schedule, and information on how you plan to prepare and validate the data. You also share some of your initial results and the pie chart you created.

In addition, you identify the problem type, or domain, for the data analysis project. You decide that the historical sales data can be used to provide insights into the types of books that will sell best during Women's History Month this coming year. This will also enable you to determine if Athena's Story should begin selling more children's literature and feminist zines.

Using historical data to make informed decisions about how things may be in the future is an example of discovering connections.

- ☐ True
- ☒ False

✓ Richtig

Using historical data to make informed decisions about how things may be in the future is an example of making predictions.

6. Scenario 2, questions 6-10

0.5 / 1 Punkten

You've completed this program and are now interviewing for your first junior data analyst position. You're hoping to be hired by an event planning company, Patel Events Plus. Access the job description below:

Junior Data Scientist Job Description.pdf

So far, you've successfully completed the first round of interviews with the human resources manager and director of data and strategy. Now, the vice president of data and strategy wants to learn more about your approach to managing projects and clients. Access the email you receive from the human resources director below:

Human Resources Director Email.pdf

You arrive Thursday at 1:45 PM for your 2 PM interview. Soon, you're taken into the office of Mila Aronowicz, vice president of data and strategy. After welcoming you, she begins the behavioral interview.

First, she hands you a copy of Patel Events Plus's organizational chart. Access the chart below:

Patel Event Plus Org Chart.pdf

As you've learned in this course, stakeholders are people who invest time, interest, and resources into the projects you'll be working on as a data analyst. Secondary stakeholders are also typically responsible for managing the data. Based on what you find in the organizational chart, which of the secondary stakeholders are responsible for managing the data? Select all that apply.

- ☒ Data analytics coordinator

✓ Richtig

✓ **Richtig**
The secondary stakeholders responsible for managing the data are the data analytics coordinator and junior data analyst.

- ☐ Junior data analyst
- ☐ Project manager, strategy
- ☒ Project manager, analytics

! **Diese Antwort sollte nicht ausgewählt werden**
Review the section on primary and secondary stakeholders for a refresher.

7. Scenario 2 continued

1 / 1 Punkten

Next, the vice president wants to understand your knowledge about asking effective questions. Consider and respond to the following question. Select all that apply.

Let's say we just completed a big event for a client and wanted to find out if they were satisfied with their experience. Provide some examples of measurable questions that you could include in the customer feedback survey.

- ☒ On a scale from 1 to 5, how likely are you to recommend Patel Events Plus?

✓ **Richtig**
In the SMART methodology, measurable questions can be quantified and assessed. This might include a 1-to-5 scale or questions with ranked responses.

- ☐ What problems did you experience with our events team?
- ☒ How satisfied were you with our event planning service — dissatisfied, neutral, or satisfied?

✓ **Richtig**
In the SMART methodology, measurable questions can be quantified and assessed. This might include a 1-to-5 scale or questions with ranked responses.

- ☐ What did you most love about your event experience?

8. Scenario 2 continued

1 / 1 Punkten

Now, the vice president presents a situation having to do with resolving challenges and meeting stakeholder expectations. Consider and respond to the following question.

You're working on a rush project, and you discover your dataset is not clean. Even though it has numerous nulls, redundant data, and other issues, the primary stakeholder insists that you move ahead and use it anyway. The project timeline is so tight that there simply isn't enough time for cleaning. How would you handle that situation?

- ☒ Communicate the situation to your supervisor and ask for advice on how to handle the situation with the stakeholder.
- ☐ Clean the data as quickly as you can. It's not perfect, but it's better than it was before, and this way you can meet the deadline.
- ☐ Contact the stakeholder's boss to let them know about the issue and ask for help managing the stakeholder's expectations.
- ☐ The stakeholder is in charge. It's best to do as they say and use the unclear dataset.

✓ **Richtig**
This situation presents an opportunity to communicate, collaborate, and foster positive working relationships.

9. Scenario 2 continued

0.75 / 1 Punkten

Your next interview question deals with sharing information with stakeholders. Consider and respond to the following question. Select all that apply.

Let's say you've created a report to present stakeholders with information about an upcoming event. Describe the benefits of using a report.

- ☒ Reports provide a snapshot of high-level, historical data.

✓ **Richtig**
Reports provide a snapshot of high-level, historical data and reflect data that's already been cleaned and sorted.

- ☒ Reports reflect data that's already been cleaned and sorted.

✓ **Richtig**
Reports provide a snapshot of high-level, historical data and reflect data that's already been cleaned and sorted.

- ☒ Reports enable stakeholders to interact with the data.

! **Diese Antwort sollte nicht ausgewählt werden**
Review the section on dashboards and reports for a refresher.

- ☐ Reports offer live monitoring of incoming data.

10. Scenario 2 continued

0 / 1 Punkten

Your final behavioral interview question involves using metrics to answer business questions. Your interviewer hands you a copy of [PatelEventsData](#) (link to download as CSV below instead).

PatelEventsData - Patel Events Plus dataset.csv

Then, she asks:

Recently, Patel Events Plus purchased a new venue for our events. To calculate the return on investment of this purchase, you'd use the metrics of purchase price (cost) and net profit of all 2019 events. **Which function would you use to determine the net profit currently shown in cell F2?**

- ☐ SUM
- ☐ AVERAGE
- ☐ MAX
- ☒ ROI

 Falsch

Review the section on spreadsheet formulas and functions for a refresher.
