Test your knowledge on data integrity

GESAMTPUNKTZAHL 3

1. Which process do data analysts use to make data more organized and easier to read?

1 / 1 Punkten

- ☒ Data manipulation
- ☐ Data transfer
- ☐ Data replication
- ☐ Data uniformity

✓ Richtig

To make data more organized and easier to read, data analysts use data manipulation.

2. Fill in the blank: The degree to which data conforms to certain business rules or constraints determines the data's ____.

1 / 1 Punkten

- ☐ range
- ☒ validity
- ☐ completeness
- ☐ structure

✓ Richtig

The degree to which data conforms to certain business rules or constraints determines the data's validity.

3. Which of the following is an example of invalid data?

1 / 1 Punkten

- ☐ A string data type containing more than one word
- ☐ Values for two customers with the same first initial but different last names
- ☒ A mandatory value that has been left blank
- ☐ A value that equals the last number in a data range

✓ Richtig

A mandatory value left blank is invalid because mandatory values must be filled in.
