NEUESTE EINREICHUNGSBEWERTUNG

			1. Questions 1-7	1/1 Punkten
	For the past six months, you have been working for a direct-mail marketing firm as a junior marketing analyst. Direct mail is advertising material sent to people through the mail. These people can be current or prospective customers, clients, or donors. Many charities depend on direct mail for financial support.			
	Your company, Directly Dynamic, creates direct-mail pieces with its in-house staff of graphic designers, expert mail list services, and on-site printing. Your team has just been hired by a local nonprofit, Food Justice Rock Springs. The mission of Food Justice Rock Springs is to eliminate food deserts by establishing local gardens, providing mobile pantries, educating residents, and more. Click below to read the email from Tayen Bell, vice president of marketing and outreach.			
			C5 Course Challenge, Email From Tayen Bell, Directly Dynamic .pdf PDF-Datei	
	You l	begir	by reviewing the dataset.	
		may	click the link to create a copy of the dataset: <u>Dynamic Dataset</u> .	
	Or, if	fyou	don't have a Google account, download the template directly from the attachment below.	
	anyo		has asked you to send two separate mailings: one to people within 50 miles of Rock Springs: the other to utside that area. So, to research each donor's distance from the city, you first need to find out where all of these e.	
	You (	could	scroll through 209 rows of data, but you know there is a more efficient way to organize the cities.	
	Which of the following procedures will enable you to sort your spreadsheet by city (Column K) in ascending order? Select all that apply.			
	י כ	Use 1	he SORT function syntax: =SORT(A2:R210, K, TRUE)	
١	<b>V</b>	Use 1	he SORT function syntax: =SORT(A2:R210, 11. TRUE)	
	*	T f	ichtig o sort your spreadsheet by city in ascending order, you can use one of two methods. You can use the SORT unction syntax = SORT(A2:R210, 11, TRUE). You can also select A2-R210, then use the drop-down menu to Sort heet by Column K from A to Z.	
١	<b>✓</b> :	Seled	t A2-R210, then use the drop-down menu to Sort Sheet by Column K from A to Z	
	~	T f	ichtig o sort your spreadsheet by city in ascending order, you can use one of two methods. You can use the SORT unction syntax =SORT(AZ:R2:10, 11, TRUE). You can also select AZ-R2:10, then use the drop-down menu to Sort heet by Column K from A to Z.	
١	: 🗆	Seled	t A2-R210, then use the drop-down menu to Sort Range by Column K from A to Z	
	Scen	nario	1. continued	1/1 Punkten
	You notice that many cells in the city column. Column K. are missing a value. So, you use the zip codes to research the correct cities. Now, you want to add the cities to each donor's row. However, you are concerned about making a mistake, such as a spelling typo.			
		ıt spı	eadsheet tool allows you to control what can and cannot be entered in your worksheet in order to avoid

At this point, you notice that the information about state and zip code is in the same row. However, your company's mailing list software requires states to be on a separate line from zip codes.

What function will enable you to move the 2-character state abbreviation in cell L2 into its own column? Type your answer below.

Falsch

Review the section on spreadsheet functions for a refresher. Keep in mind LEFT is a function that returns a snumber of characters from the left side of a text string. A text string is a group of characters within a cell. For

1 / 1 Punkten

Next. you duplicate your dataset twice using the Sheet Menu. You rename the first sheet Donation Form List, and you remove the cities that are further than 50 miles from Rock Springs. You rename the second sheet Postcard List, and you remove the cities that are within 50 miles of Rock Springs.

Then, you import these datasets into your company's mailing list database. In a mailing list database, you create two tables: Donation\_Form\_List and Postcard\_List. You decide to clean the Donation\_Form\_List first.

Your company's mailing list software requires units to be on the same line as street addresses. However, they are currently in two separate columns (street address and unit).

What portion of your SQL statement will instruct the database to combine these two columns into a new column called "address"? Type your answer below.

✓ Richtig

### 6. Scenario 1, continued

1 / 1 Punkten

Your database contains people who live in many areas of Wyoming. However, it's important to align your in-house data with the data from Food justice Rock Springs. You also need to separate your data into the two lists: Donation\_Form\_List and Postcard\_List. They will be based on each city's distance from Rock Springs.

What SQL function do you use to select all data from the Donation\_Form\_List organized by zip code?

O SEQUENCE

O ORGANIZE

O ARRANGE BY

ORDER BY

✓ Richtig

To select all data from the Donation\_Form\_List organized by zip code, you use the ORDER BY function. The ORDER BY function sorts results returned in a query.

# 7. Scenario 1, continued

0 / 1 Punkten

You finish cleaning your datasets, so you decide to review Tayen's email one more time to make sure you completed the task fully. It's a good thing you checked because you forgot to identify people who have served on the board of directors or board of trustees. She wants to write them a thank-you note, so you need to locate them in the database.

To retrieve only those records that include people who have served on the board of trustees or on the board of directors, you use the WHERE function. The syntax is:

FROM Donation\_Form\_List WHERE Board\_Member = "Yes" AND Trustee = "Yes"

True

O False

Falsch

Review the section on SOL functions for a refresher

# 8. Scenario 2, Questions 8-13

1 / 1 Punkten

Your company's direct-mail campaign was very successful, and Food justice Rock Springs has continued partnering with Directly Dynamic. One thing you've been working on is assigning all donors identification numbers. This will enable you to clean and organize the lists more effectively.

Meanwhile, another team member has been creating a prospect list that contains data about people who have indicated interest in getting involved with Food justice Rock Springs. These people are also assigned a unique ID. Now, you need to compare your donor list with the dataset in your database and collect certain data from both.

What SQL function will return records with matching values in both tables?

O LEFT JOIN

O OUTER JOIN

INNER JOIN

✓ Richtig

An INNER JOIN function will return records with matching values in both tables

9. Scenario 2, continued

1 / 1 Punkten

information to set a donation minimum for inviting donors to an upcoming event. You start with 2019. To return average contributions in 2019 (contributions 2019), you use the AVG function. What SQL query will instruct the database to find this average and store it in the AvgLineTotal variable? O AVG (contributions\_2019) = "AvgLineTotal" O AVG ("contributions\_2019") WHERE AvgLineTotal 10. Scenario 2. continued 1 / 1 Punkten a new community garden. You return to your New Donor List spreadsheet to determine how much each donor gave in the past two years. You will use that information to identify the 50 top donors and invite them to the event. You may click the link to create a copy of the dataset: <u>Dynamic Dataset</u>. Please refer to the **New Donor List** tab. Or, if you don't have a Google account, download the template directly from the attachment below What is the correct syntax to add the contribution amounts in cells O2 and P2? SUM(O2,P2) =SUM(O2\*P2) ✓ Richtig formula =O2+P2. 11. Scenario 2, continued 1/1 Punkten Tayen informs you that she's thinking about inviting anyone who donated at least \$100 in 2018, as well. However, she only has five open spaces, bit easks you to report how many people gave at least \$100 so she can determine if they can also be invited to the event. What is the correct syntax to count how many donations of \$100 or greater appear in Column Q (Contributions 2018)? O =COUNTIF(Q2:Q210>=100) ( =COUNTIF(Q2:Q210,">=100") O =COUNTIF(Q2:Q210">=100") O =COUNTIF(Q2:Q210,>=100) ✓ Richtig To count how many donations of \$100 or greater appear in Column Q, the correct syntax is =COUNTIF(Q2:Q210,">=100"). 12. Scenario 2, continued 1 / 1 Punkten The community garden grand opening was a success. In addition to the 55 donors Food Justice Rock Springs invited, 20 other prospects attended the event. Now, Tayen wants to know the percentage of donations that came in that day from the new prospects compared to the original donors. Which SQL query can be used to calculate the percentage of contributions from prospects? O SELECT event\_contributions,
Total\_donors, Total\_prospects, FROM contributions\_data SELECT Total\_donors, Total\_prospects, (Total\_prospects / Total\_donors \* 100) AS Prospects\_Percent FROM contributions\_data O SELECT Total\_prospects, ("Total\_prospects", "Total\_donors" \* 100) AS Prospects\_Percent O SELECT Total\_donors, Total\_prospects, (Total\_prospects AND Total\_donors = 100) AS Prospects\_Percent

/ Richtig

```
To identify the percentage of contributions from prospects, the correct query is:
               event_contributions,
Total_donors,
Total_prospects,
               (Total_prospects / Total_donors * 100) AS Prospects_Percent FROM contributions_data
13. Scenario 2, continued
                                                                                                                                                         1 / 1 Punkten
    Your team creates a highly effective prospects list for Food Justice Rock Springs. After a few months, many of these prospects become donors. Now, Tayen wants to know the top three cities in which these new donors live. She will use that information to determine if it's still true that people who live closer to Rock Springs are more likely to donate.
    Which SQL query will retrieve the number of donors in each city, sorted high to low?
    O SELECT City(DonorID), City
          FROM new_donor_list
GROUP BY COUNT
ORDER BY City(DonorID) ASC
    ● SELECT COUNT(DonorID), City
          FROM new_donor_list
GROUP BY City
           ORDER BY COUNT(DonorID) DESC
    O SELECT COUNT(DonorID), City
          FROM new_donor_list
GROUP BY COUNT
    O SELECT COUNT(DonorID), City
          FROM new_donor_list
GROUP BY City
ORDER BY COUNT(DonorID) ASC
```

FROM new\_donor\_list
GROUP BY City
ORDER BY COUNT(DonorID) DESC
