GESAMTPUNKTZAHL 4

1.
```
SELECT *
FROM employee
WHERE jobCode = 'FTE'
      AND LastName = 'James'
```

1 / 1 Punkten

What does the asterisk (*) after SELECT tell the database to do in this query?

○ Select, then delete data.

◉ Select all data.

○ Select and filter data.

○ Select and multiply data.

✓ **Richtig**
The asterisk tells the database to select all data in the table.

2.
```
SELECT *
FROM employee
WHERE jobCode = 'FTE'
      AND LastName = 'James'
```

1 / 1 Punkten

In this query, the data analyst wants to retrieve data from which table?

○ jobCode

○ James

◉ employee

○ LastName

✓ **Richtig**
The data analyst wants to retrieve data from the employee table.

3.
```
SELECT *
FROM employee
WHERE jobCode = 'FTE'
      AND LastName = 'James'
```

1 / 1 Punkten

In this query, the data analyst wants to retrieve all data from the employee table, where the jobCode is FTE and the last name is James.

◉ True

○ False

✓ **Richtig**
This query asks the database to select all data from the employee table, where the jobCode is FTE and the last name is James.

4. You are writing a query and want to instruct the database to retrieve data from the warehouse_inventory table. What is the SQL statement that follows SELECT *? Type your answer below.

1 / 1 Punkten

FROM warehouse_inventory

✓ **Richtig**
The correct SQL statement is FROM warehouse_inventory. FROM indicates where the selected data comes from. And warehouse_inventory is the name of the table.
