Test your knowledge on understanding data analysis

GESAMTPUNKTZAHL 3

1. You are creating a spreadsheet that contains data about a volunteer theater production. You ask the volunteers which tasks they have already completed, then add that data to the spreadsheet. Next, you will use the information provided by the volunteers to figure out which tasks still need to be done. This is an example of which phase of analysis?

   ⬜ Organizing data

   ⦿ Getting input from others

   ⬜ Transforming data

   ⬜ Formatting and adjusting data

   `1 / 1 Punkten`

   > ✓ **Richtig**
   > This is an example of getting input from others. Getting input involves soliciting information from other sources to inform your decisions.

2. You are working with three datasets about voter turnout in your county. First, you identify relationships and patterns between the datasets. Then, you use formulas and functions to make calculations based on your data. This is an example of which phase of analysis?

   ⬜ Formatting and adjusting data

   ⬜ Organizing data

   ⬜ Getting input from others

   ⦿ Transforming data

   `1 / 1 Punkten`

   > ✓ **Richtig**
   > This is an example of transforming data, which involves identifying relationships and patterns between the datasets and making calculations based on the data.

3. You are working with a dataset from a local community college. You sort the students alphabetically by last name. This is an example of which phase of analysis?

   ⬜ Organize data

   ⦿ Format and adjust data

   ⬜ Transform data

   ⬜ Get input from others

   `1 / 1 Punkten`

   > ✓ **Richtig**
   > Sorting a list of students alphabetically is an example of formatting and adjusting data. This is a step analysts take to rearrange the data to make it easier to work with.
