Test your knowledge on organizing data

GESAMTPUNKTZAHL 2

1. Fill in the blank: A data analyst uses _____ to decide which data is relevant to their analysis and which data types and variables are appropriate.

   1 / 1 Punkte

   ◉ database organization

   ○ database normalization

   ○ database references

   ○ database relationships

   ✓ **Richtig**
   Database organization enables analysts to make decisions about which data is relevant to pull for a specific analysis. It also helps them decide which data types and variables are appropriate.

2. You are working with a dataset that lists student athletes at a school. The Sport column designates the sport each athlete plays. Which of the following SQL queries would return only the athletes who play volleyball?

   1 / 1 Punkte

   ○ WHERE Sport = Volleyball

   ○ SPORT("Volleyball")

   ◉ WHERE Sport = "Volleyball"

   ○ SPORT = "Volleyball"
